University of Chicago

#SASM17Boston
PROGRAM OBJECTIVE
The objective of this meeting is to provide a forum for discussions pertaining to the common grounds between sleep and anesthesia. The goal is to promote excellence in medical care, research and education in anesthesia, sleep medicine and perioperative medicine.

TARGET AUDIENCE
This conference is designed for anesthesiologists, critical care physicians, residents, fellows-in-training, general medicine physicians, pulmonary physicians, sleep medicine physicians, surgeons, scientists and allied health care professionals.

PRACTICE GAPS
The overall goal of SASM is to advance standards of care for clinical problems shared by anesthesiology and sleep medicine, including perioperative management of sleep disordered breathing (SDB), and to promote interdisciplinary communication, education and research in matters common to anesthesia and sleep.

To identify and address present clinical practice gaps, we propose to explore the following gaps existing today in care of patients with sleep-disordered breathing:

1. Research on the topic of perioperative sleep disordered breathing remains rare and best suited study designs are sought to answer related questions.
2. The adequate availability and utility of sleep laboratories to diagnose obstructive sleep apnea versus ambulatory approaches and the right approach to perioperative patients is intensely debated.
3. It remains unknown if postoperative monitoring for patients with sleep disordered breathing is effective.
4. The safety of opioids used in a perioperative and chronic setting in patients with sleep disordered breathing has been questioned and associated risk of complications and related mechanisms by which this patient population may be exposed to increased risk remain poorly understood.
5. In the era of early recovery programs and increasing ambulatory surgical procedures the influence of sleep disordered breathing on patient selection from a medical and legal perspective remains debated.
6. Evidence based guidelines regarding the intraoperative care of surgical patients with sleep disordered breathing and/or narcolepsy remain elusive.

LEARNING OBJECTIVES
1. Discuss and understand the role of diagnostic modalities and monitoring tools for patients with sleep disordered breathing.
2. Discuss and understand the role of opioid administration in patients with sleep disordered breathing and its impact on complications.
3. Discuss and understand the impact of sleep disordered breathing on eligibility for early recovery programs and ambulatory care.
4. Discuss and understand the current evidence for the intraoperative care of patients with sleep disordered breathing and perioperative care of patients with narcolepsy.

ACCREDITATION STATEMENT
This activity has been planned and implemented in accordance with the accreditation requirements and policies of the Accreditation Council for Continuing Medical Education (ACCME) through the joint providership of Amedco and the Society of Anesthesia and Sleep Medicine (SASM). Amedco is accredited by the ACCME to provide continuing medical education for physicians.

CREDIT DESIGNATION STATEMENT
Amedco designates this live activity for a maximum of 13.5 AMA PRA Category 1 Credits™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

HOTEL INFORMATION
The Society of Anesthesia and Sleep Medicine 7th Annual Meeting will be taking place at the Hilton Boston Logan Airport in Boston, Massachusetts, from October 19-20, 2017. Starting in June 2017, please make your hotel reservations online through the American Society of Anesthesiologists room block by visiting www.ASAhq.org. Be sure to book your room as soon as possible to ensure availability!
